Profile

FAMATEC was founded in 1988 and is a
certified UNI EN ISO 9001:2000 firm.

We study and create pneumatic solutions for
assisted manual movement of products
during the productive process of
manufacturing companies.

The young and dynamic spirit that has
distinguished FAMATEC over the years
combined with competence and know-how has
driven the company towards new ambitious
growth and market objectives.

Our strengths are our products, all highly
developed technologically, innovative solutions
with one of a kind design.

enjoy flexibility

our **Philosophy**

Our Mission is to create value and safety for our clients through excellent solutions and service.

We strive to unite all of our best professional and human resources, while respecting the dignity of the individual through participation, personal growth, honesty and transparency. We aim to satisfy the needs of the productive environment by improving working conditions, safety and quality.

Achieving the ambitious goals that we have set for our company also satisfies the expectations of our shareholders. It is our intention to fulfill our individual lifetime needs for growth and belonging while remaining fully aware of our responsibility to society as a whole.

**FAMATEC continuously
aims for total
client satisfaction.**

FAMATEC constantly invests in the total satisfaction of their clients, assisting them at every moment. From the very first contact, professionalism, competence and excellent service make up the foundation for a relationship that places the client first in every circumstance. An organizational structure in accordance with the most modern management standards was created to guarantee appropriate assistance, which has made FAMATEC the choice of some of the most prestigious companies. The professionalism and skill of our Customer Service Department follows the client through the phases of installation, maintenance, technical intervention requests and requests for spare parts, and provides all of the necessary tools for convenient, easy use and perfect functionality of all FAMATEC solutions.

Customer Care

Strenght

A young and dynamic environment

A young and dynamic environment combined with a strong sense of belonging and respect for human values permits **FAMATEC** to achieve and maintain the high standards of quality in our products and services through constant updating and training. We are able to organize, comprehend, design, create and provide assistance for a truly effective working cycle.

The human resources of **FAMATEC** are organized into teams that work in close contact with one another, and that are constantly searching for well-aimed confrontation to produce the best results. Everyday, the exchange of ideas and energy permits each single collaborator to feel like an active, functional, dynamic part of the solution that will help the clients to optimize their productive systems with the help of **FAMATEC**.

of new solutions

Ergonomics and Functionality

The solutions provided by FAMATEC are recognized as points of reference for ergonomics and functionality. The ability to use a practical, functional, intuitive console combined with special attention to reducing inertia renders FAMATEC solutions one of a kind for their light weight and ease of use.

Research and development of new solutions that are perfectly aligned with the needs of the user provide elevated capacity and action radius.

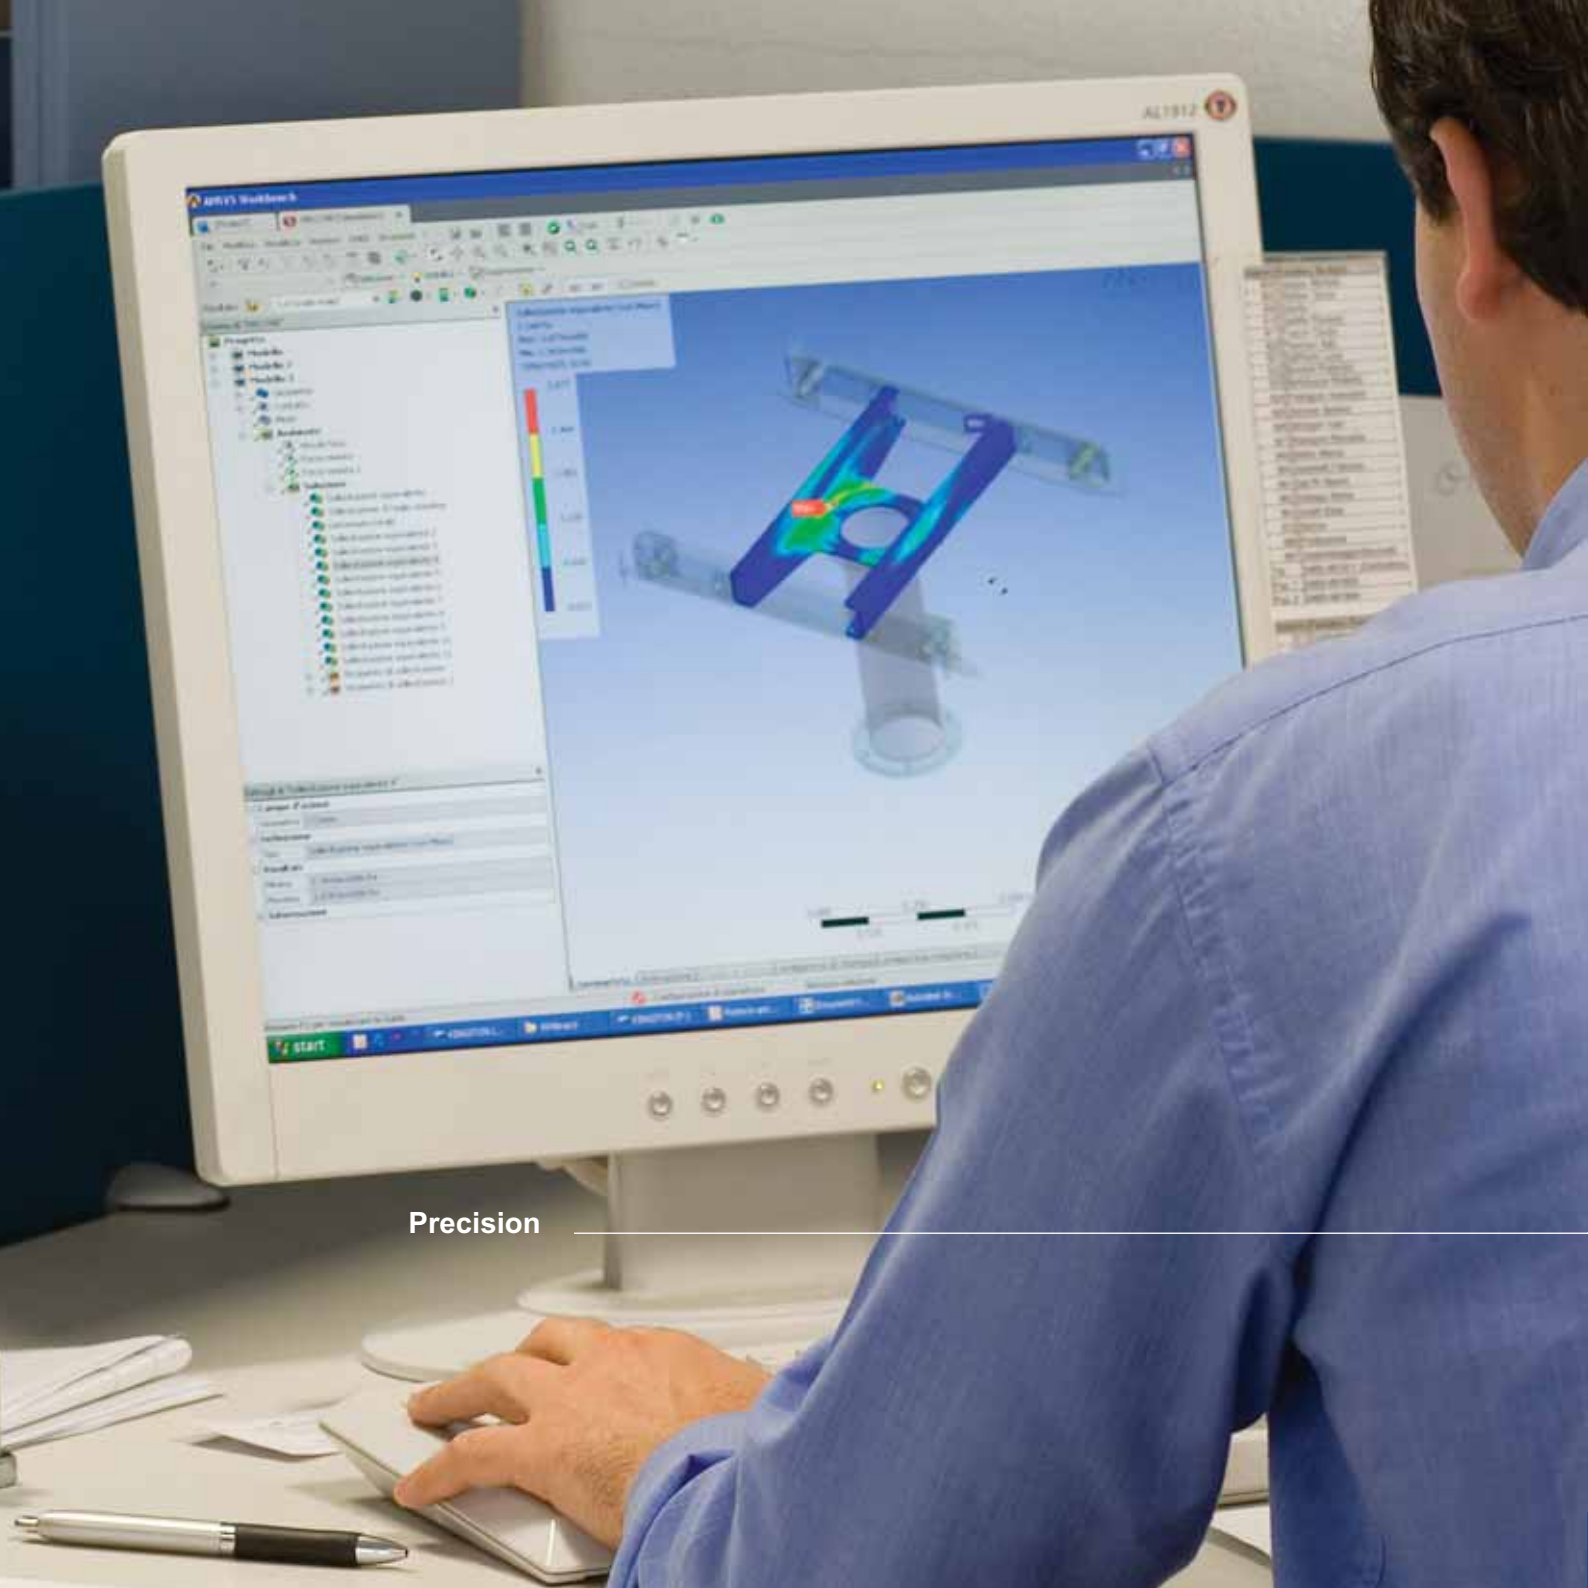

FAMATEC pays special attention to design, and always offers attractive solutions in bright colors.

This approach has the effect of improving the operator's attention when using the equipment, and therefore reduces the need for maintenance.

Design

Precision

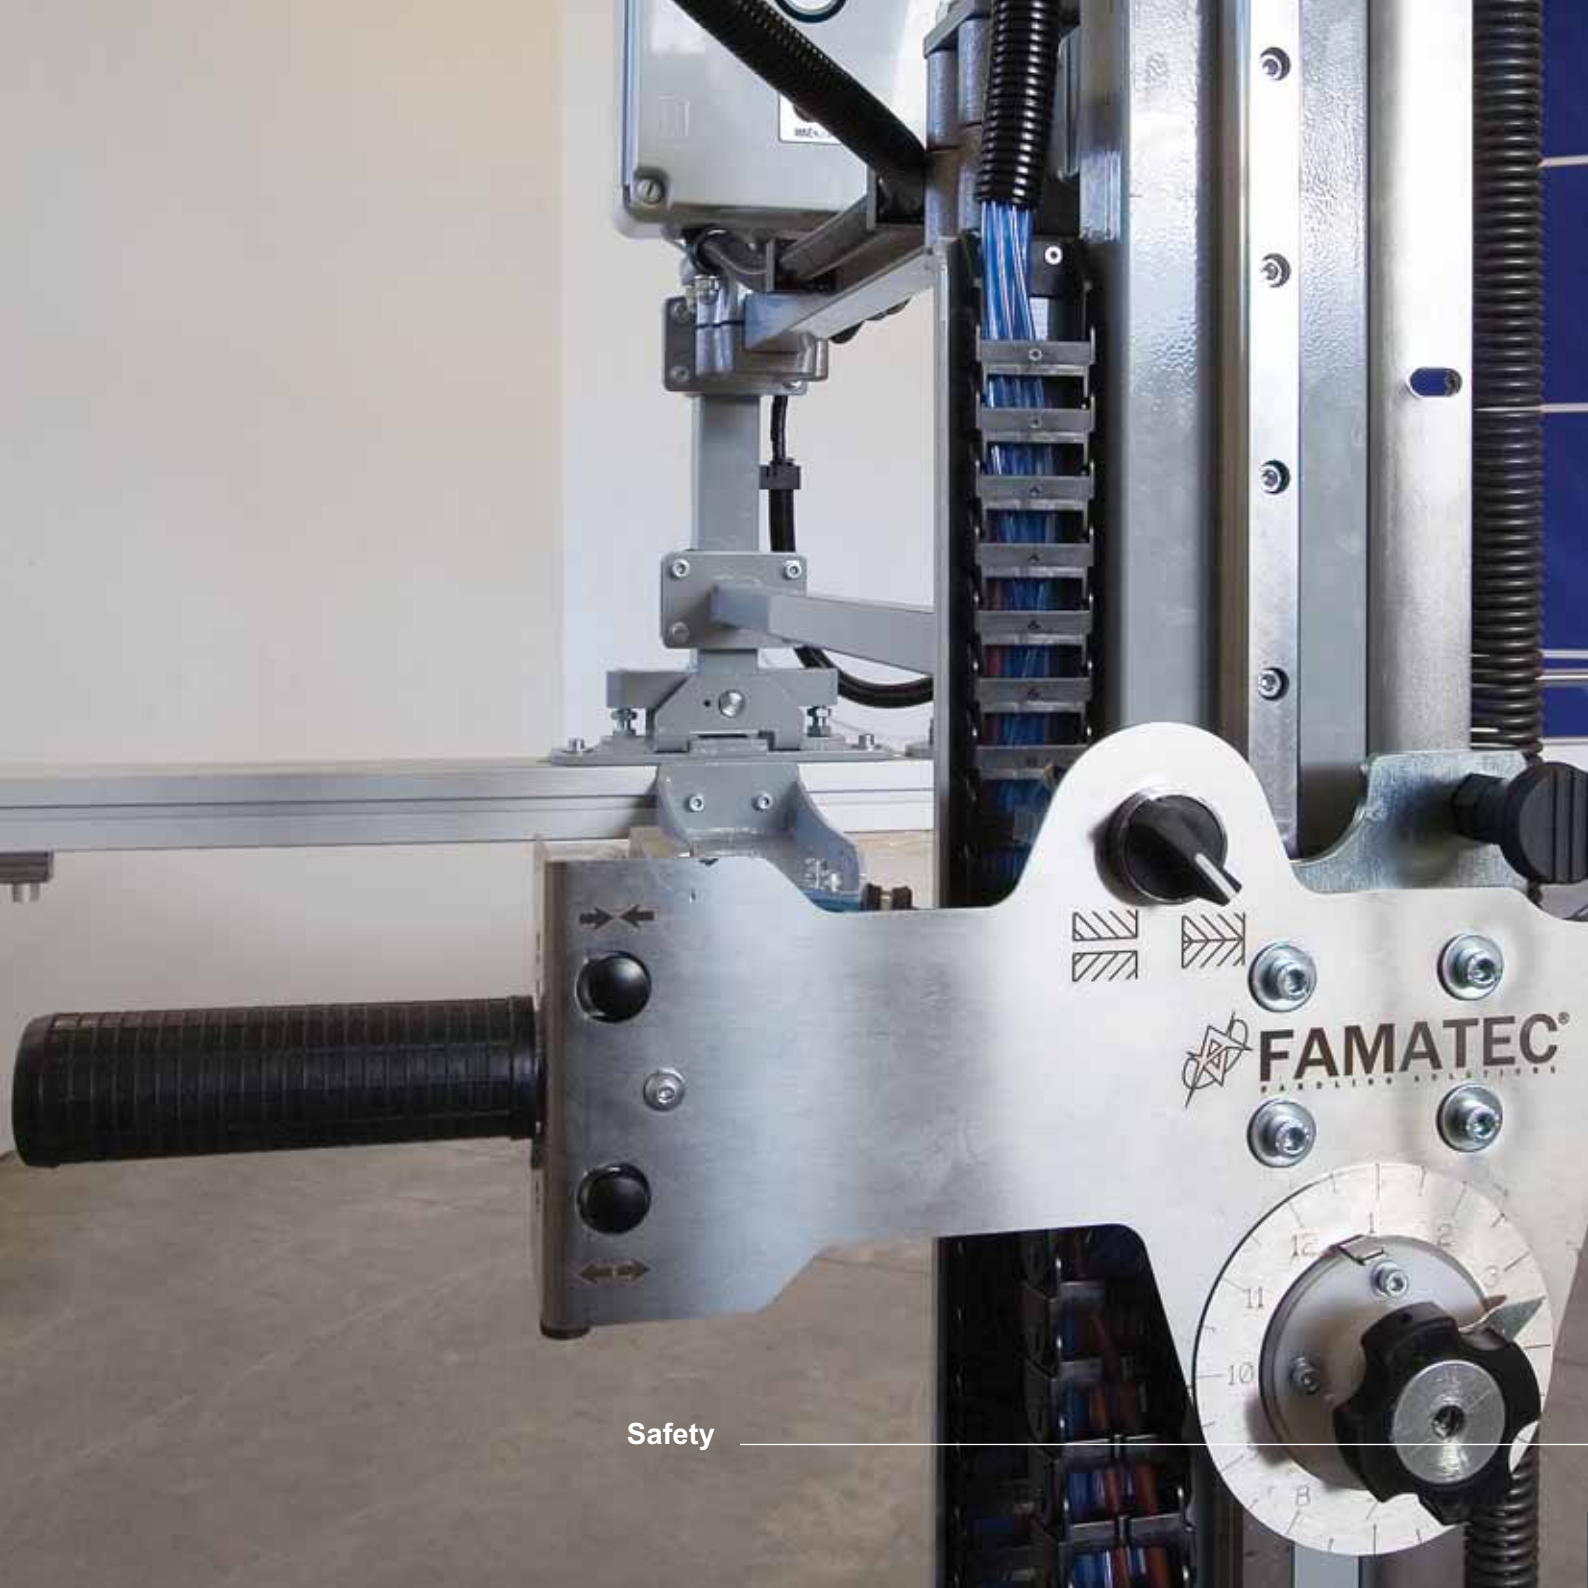

Innovative instruments

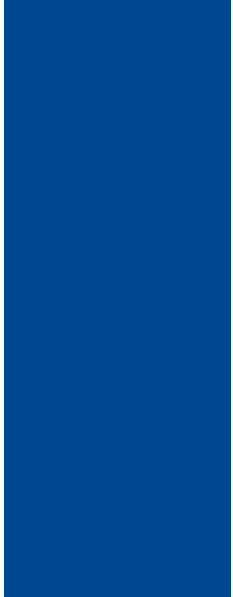

FAMATEC guarantees excellent service to its clients through superb organization united with the most modern technologies, such as 3D design, rational activities management, process control during every phase, new generation communication systems and the use of machines and materials that optimize productive cycles. For this reason, FAMATEC constantly invests in modern, innovative instruments to support service to the client. Every sector of the company utilizes the best information, management, productive and organizational systems to ensure that each collaborator works in ideal conditions, and that all of our clients receive and utilize solutions in perfect accordance with their needs.

Modern Technologies

Safety

The quality and reliability of **FAMATEC** solutions are guaranteed through careful management of processes, which is the natural result of a modern organizational system. **FAMATEC** was certified in 1999 in conformity with the requirements outlined in UNI EN ISO 9001:2000 and maintains its fundamental objectives constantly in sight, which results in total client satisfaction.

Every **FAMATEC** product bears the CE marking, in accordance with European Directives.

Solutions for applications in particular environments are subject to specific regulations

As far as safety and ergonomics are concerned, **FAMATEC** designs solutions in strict adherence to the standards dictated by enforced Harmonized Regulations, reflecting current State of the art technology , activating an inherent presumption of conformity.

Quality and Certification

FAMATEC designs and creates systems to address the needs of its clients with four different brands.
